Workshop on Erasmus-Mundus for Students in Industrial Management

In the midst of the exam session 10 students from the degree programme in Industrial Management in Ruse University took part in the Leadership and Risk Management workshop on 25th January. The Armenian lecturers Hartjun Gevorgjan and Vahe Abrahamjan were the presenters in the event organized by the Department of Management and Business Development under the Erasmus-Mundus programme. They are here on a 10-month exchange programme at the Faculty of Business and Management and agreed to share the significant experience they had mustered on the topic during their work on projects of NATO and JUNESCO.

Following a lively discussion with the presenters, the students participated in leadership training simulation games and practical situations, led by assistant prof. Svilen Kunev. The participants have been selected last November through a competition for writing an essay in English. They have been awarded diplomas for their successful participation in the discussion and training.
